

Appreciating what this offer means to your city, its departments and others cities surrounding you. Whether you're based in the USA, U.K, Australia or New Zealand, GRIP is ready and waiting for your city to come on board.

- Free unlimited use of the GRIP database for graffiti entries, searches and full city reporting. For 12 months.
- Free 1 hour live tutorial in data entry for in house staff, clerks or volunteers.
- Free support as required to help you get the most from the system.
- Free access to training screen demos, updates and new modules.
- Free first 50 entries. We want to help get you started so we'll even get some entries in for you, to get you going.
- Open use for all other crime types within the GRIP database (26)
- Open use for your school district, transit, Parks division.
- Unlimited photos or records regardless of department.
- No hidden fees for server use or data storage.
- No limits on size or scope of your use.
- (We'll allow a whole County on for free in this open offering)
- Multiple access levels Citizen, clerk, LEA, reader only or contractor.
- Do your own data entry with our guidance and tutorial.
- Use us for your entry work & analysis if you prefer.

We simply believe what we have created and what's being enjoyed is the best platform out there and we want those who have had reservations to jump in and realize what a great tool and resource we are making possible.

Comprehensive, fully share able specialist graffiti and crime database for free?

Yes.

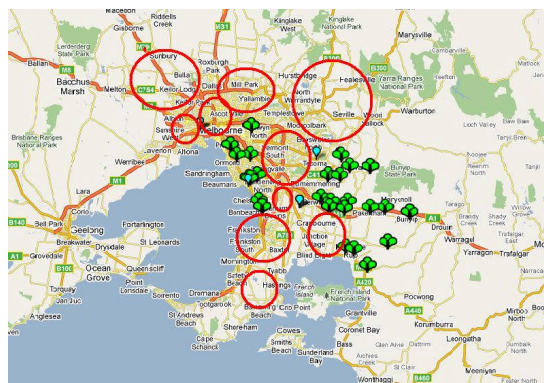

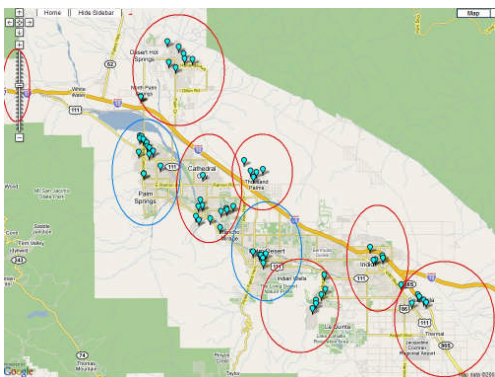

Your City or department can have, within a few days, full and open access and entry rights to the GRIP database for a period of 12 months to trial, test, and experience and enjoy this fully featured system.

You may already gather data in your own way and GRIP will help you take 10 steps forward from that method to a expertly designed fully functioned system that all can actively participate in and share.

You may already use a commercially licensed database. GRIP will release you from that expense and show you a more superior system that will benefit not only your abatement teams or graffiti investigators but ALL departments who want to experience tracking and mapping for additional crime types within GRIP.

Some of you may save anywhere from \$3,000 - \$120,000 in your first year alone if using other commercial systems.

For those of you who have never used a fully functional server database this unique opportunity will allow you and every city surrounding you to be on a shared level instantly.

Whether a single city or a cluster, within days all can be on one shared platform. Without reservation.

So why are we offering this?

To allow those who have never tried and experienced what a proper graffiti database can bring to experience.

To allow those using external graffiti reading services to realize it can be done in house with our help and assistance.

To allow cities in clusters to realize their full potential of catching serial offenders who affect you all.

Your city will be fully trained and functioning in days.

No GPS equipment required, No specialist cameras, and using your existing digital cameras readily.

So what's the catch? There is none, 12 months unlimited records, Unlimited images, You can't beat that at all
