

Making It Happen

Getting things going is a very straight forward and easy process
Welcome on board!

Once you've read through the materials and decided to take GRIP into your stable believe me you have made a great decision for your city.

In all honesty we have used, tested and researched all manner of implements, gadgets, software, hardware in the course of our field work and have always gone back to some pretty basic principles to get the job done and to make sure it's as easy and trouble free as possible. Making it just as easy for you and your city designing the GRIP system means you have the ability now to save your city thousands, use it for all manner of situations and really start seeing benefits almost immediately.

If you provide us with some basic information about your needs, it will give us some information about your current situation, so we can really get to appreciate how best to serve you. Whether you just want to use the GRIP system or want some extended help in data entry isn't as important at this stage. Getting you set up and started is the priority.

Please contact us directly by emailing us at inquiry@gripsystems.org and we will put together a proposal on how best to serve your needs.
