

POLICE ENGAGED THROUGH LIVE ACCESS DATA, AND USE OF THE LIVE APPREHENSION CAMERAS

Historically, Police have not been engaged in graffiti type criminal activity as it has not hit their official statistics through normal reporting of new vandalism.

Once the audit is completed, a clear picture is created with anywhere from 1000- 4000 individual incidents taken into the GRIPSYSTEMS database.

At this point Police are normally engaged and the true picture is clearly appreciated by area command. In almost every instance our clients have then enjoyed a rapport with their Police as they task the problem, use the database and work to apprehending the worst offenders.

GRIPSYSTEM is available to all Police on a 24/7 log in basis which allows an officer at any time to search, analyse and print materials needed for interview, warrant on an address or for court room evidence.

Post audit many cities have focused further with our live apprehension cameras with an MOU with their Police to attend and apprehend live on site.

It is true that in the past, graffiti crime has been low on the priority list of most stations. With the audit lump sum data and post audit incoming data it gives Police a new found interest along with the apprehension tools the cities typical allow them to use.

Your Police are more than willing to help and assist but they need solid and real data that's dependable and available 24/7 . GRIP delivers this requirement.
